June 16, 1999

Barry,

I would like to take this opportunity to thank you and your staff for a job well done. Please extend to each and every member of Kitchener Aero my sincerest gratitude for his or her efforts in the construction of our news helicopter C-FCTV. The level of professionalism and dedication is plainly evident in the superior quality E.N.G. ship that emerged from your facility in March of this year.

CTV Television Inc. decided in September of 1998 to build the first permanent E.N.G. helicopter in Canada. We turned to experts in the aviation industry, including yourselves, to help us create a flying TV studio. The elements required to convert a Bell 206 Jetranger into this flying studio were staggering. The input from you and your creative staff was invaluable to the successful completion of our goal. That final product, C-FCTV proved to be second to none.

To-date your staff remains committed to provide follow up service at the drop of a hat. Pressures to remain airborne are high and expedient service means a lot to us.

Obviously I'm more than satisfied with our relationship with Kitchener Aero Avionics. Thanks again from all of us here at CTV.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeff Long', written over a white background.

Jeff Long
Member,
CTV Helicopter Integration Team.
